## P R E F A C E.

---

We beg to present to our friends and the public a Catalogue and List of Prices of the various descriptions of Goods manufactured by us.

An experience of twenty-seven years in our business, and unrivalled facilities for manufacturing, enable us to offer our customers Goods of superior style and quality, and to give mature and judicious Engineering and Mechanical advice (for which we make no charge) in the planning and execution of work.

Having Iron and Brass Foundries of our own, in connection with our machine shops, we claim to have facilities for executing all kinds of Work, unsurpassed by those of any other establishment in the country.

We would call the attention of our friends to the fact that we are the originators of the plan of WARMING BUILDINGS, HEATING, DRYING, &c., by STEAM, through the use of WROUGHT IRON PIPES. Our experience in this department has enabled us to bring our Apparatus to a high state of perfection. We have applied this mode of warming to more than three thousand buildings, and with uniform success.

It is our purpose to spare no exertion to maintain our reputation, and to continue to deserve the approbation of our customers.

The following Price List is a Catalogue of our manufactured articles. We are also prepared to furnish any article in our line, either of Iron or Brass, of any peculiar shape or design, and respectfully solicit such orders.

JAMES J. WALWORTH & CO.

J. J. WALWORTH,  
M. S. SCUDDER,  
C. C. WALWORTH.

**MALLEABLE IRON FITTINGS,  
FOR  
GAS AND STEAM PIPE.**

By the use of entirely new and novel machinery, which we have invented and patented, we are enabled to cut our Screws with great accuracy and with unparalleled rapidity.

WE ARE, THEREFORE, PREPARED TO OFFER

**GOODS OF SUPERIOR QUALITY,  
AND AT  
EXTREMELY LOW PRICES.**

We have an illustrated Catalogue of all our Fittings, designating the size by numbers which we will forward by mail, on application.

**FITTINGS FOR WROUGHT IRON PIPE.**

**ELBOWS.**

## CROSS-PIPE FITTING.

We call attention to this New Fitting and its use. In the construction of Steam Apparatus, the pipes running in different directions often interfere with each other in passing; this fitting allows a central passage, thus obviating all the difficulty of crossing pipes.

Size .....	.....	.....	.....	.....	1	$1\frac{1}{4}$	$1\frac{1}{2}$	2

C. C. WALWORTH'S PATENT MANIFOLD,  
OR BRANCH TEE.

(SEE FIG. NO. 1, SUPPLEMENT.)

This improvement combines the Main Pipe, Manifold and Valve in *one fitting*, dispensing with several fittings and the necessary joints and labor.

It is very easily repaired, and has the advantage of controlling the circulation through a portion or all of the radiating pipes, as the temperature may require.

Number of Branches.	No. 1. D'ble Valve, Supply, 1 in. outlets.	No. 4. D'ble Valve, Return, 1 in. outlets.	No. 2. D'ble Valve, Supply, 1 $\frac{1}{2}$ in. outlets.	No. 5. ## PATENT VERTICAL TUBE RADIATORS.

SEE FIGS. NOS. 12 AND 13, SUPPLEMENT.

This Radiator is generally acknowledged to be the most perfect Steam Radiator in use.

From its peculiar and simple construction, there is full provision for contraction and expansion in all its parts, and it is not liable to leak, as there are no packed joints; there is also positive and complete circulation throughout, and no possibility of the condensation remaining in any portion of the Radiator.

14	30	22	24	39.49	1 to 150	4	5	14	12	

"The above Pumps are calculated for feeding Steam Boilers, and forcing water under great pressure, or to a high elevation.

Please remember that in all Steam Pumps, the diameter of Water Cylinder gives the capacity, and the diameter of Steam Cylinder the amount of steam used, or cost of running. We claim our Pump in regard to the service to which it is to be applied: which carry a larger diameter of water and with less diameter of steam. This is a great advantage: We claim less steam and more work, and in addition we claim our prices lower than any other, and much more economical; and for simplicity, durability, and efficiency, defy comparison, notwithstanding others may give more extravagant figures on circulars.

## TERMS CASH.

When ordering a Pump please answer the following questions

1. Whether for Hot or Cold Water?

2. For High or Low Pressure?

3. For Salt or Fresh Water?

4. For supplying Boiler, Tank, or for Fire Purposes?

WE ARE PREPARED TO CONTRACT FOR THE FURNISHING OF

**COAL GAS WORKS,**

On the most approved plans,

FOR LIGHTING FACTORIES, PUBLIC INSTITUTIONS, SUGAR ESTATES,  
MANUFACTURING ESTABLISHMENTS, &c.

Parties requiring such kind of apparatus are respectfully requested to call at our office, where full sets of plans and working drawings can be examined, and detailed statements of the cost furnished.

**BOILERS.****Horizontal and Vertical Tubular Boilers,***Furnished and Set with Latest Improvements.*

We are enabled to exhibit results which will strongly commend our Boilers to the attention of those desirous of securing the greatest economy of fuel.

We are constantly adding to our Catalogue of Goods new and novel articles and improvements, intending to keep pace with the progress of invention in all matters relating to the application and uses of Steam.

**FACTORY AND LAUNDRY SUPPLIES,**

MANUFACTURED BY J. J. WALWORTH &amp; CO.

**IMPROVED TUBULAR WATER HEATER.**

(SEE FIG. NO. 16, SUPPLEMENT.)

In this Heater, the water passes three times through the length of the heater in sections of tubes, the exhaust steam entirely surrounding them, filling the shell of the heater; entering and discharging upon opposite sides, while the water is received and delivered at the ends.

The sizes enumerated we keep constantly on hand.

Larger Heaters, with wrought iron shells, we make to order, suitable for boilers from 50 to 250 horse power.

## SCOTCH GLASS TUBES,

## For Water Gauges.

These Tubes are warranted in every respect equal to any in the market, are of our own importation, and are offered at the lowest market price.

Every Tube warranted to stand 500 pounds pressure per square inch, and will not change color.

**THE WHELPY & STORER PULVERIZER.**

(SEE FIG. NO. 68, SUPPLEMENT.)

This Pulverizer reduces to an impalpable powder with great rapidity, Coal, Ores, Plaster, Drugs, &c.

Its advantages in the use of coal, for the generation of steam and for heating furnaces, are from 30 to 50 per cent. over the usual method.

By its use the finest dust coal, which costs but little, and heretofore comparatively useless, is utilized and made equal if not superior to the best lump coal, giving an intense body of flame which extends the entire length of a boiler.

It makes sulphurous coals as valuable as others for heating purposes.

Circulars, giving full explanations of the operation of Whelpy & Storer's process of applying pulverized fuel, furnished by JAMES J. WALWORTH & CO., Agents.

Inside Diameter. INCHES.	Revolutions per Minute.	Average Horse Power.	Yield of Coal per Hour. LBS.	PRICE.	ROYALTY.
12	2250	2	200	300 00	Two dollars per horse power per annum.
18	1800	4	300	500 00	
24	1500	8	600	700 00	

In estimating horse power, 15 square feet of heating surface for sectional and tubular boilers, 12 square feet for flue, and 10 square feet for cylinder boilers, equal one horse power.

## TUBE SCRAPERS AND BRUSHES.

### PRATT'S CONTRACTING AND EXPANDING TUBE SCRAPER.

(SEE FIG. NO. 6, SUPPLEMENT.)

From 1 to 4 inches.....\$3.00 | From 4 to 6 inches.....\$7.00

### ELASTIC TUBE SCRAPER.

(SEE FIG. NO. 21, SUPPLEMENT.)

Price per inch of diameter.....\$1.00.

### FLAT STEEL WIRE TUBE BRUSHES.

(SEE FIG. NO. 23, SUPPLEMENT.)

These Brushes being made of Spring Tempered Flat Steel Wire (Tinned), gives greater elasticity, adding more than double to the wearing surface.

The wires are firmly soldered to the shaft, which will allow the tubes to be cleaned while hot.

In ordering brushes, give the outside diameter of tubes.

The brushes are calculated to be about one-eighth of an inch smaller than the inside diameter of the tubes.

Outside Diameter of Tube. INCHES.	PRICE EACH.	Diameter of Brush. INCHES.

## WALWORTH'S PATENT SOLID DIE PLATE.

(SEE FIG. NO. 62 $\frac{1}{2}$ , SUPPLEMENT.)

We call the attention of our Customers to this new and desirable Die Plate for Cutting Threads on Iron Pipe. It combines the desirable qualities of STRENGTH AND LIGHTNESS, and is believed to be the best tool ever got up for this purpose.

No. 1 Plate, with Dies $2\frac{1}{2} \times \frac{3}{4}$ , cutting $\frac{1}{4}$ , $\frac{3}{8}$ , $\frac{1}{2}$ , $\frac{3}{4}$ and 1 inch, R.H.	\$26 00

For bending  $\frac{3}{4}$  in. Pipe, \$17 00, net. | For bending 1 in. Pipe, \$20 00, net.

**PIPE SCREWING MACHINES.****HAND SCREWING MACHINE No. 1.**

For  $\frac{1}{2}$  to  $1\frac{1}{2}$  inch Pipe, with Universal Chuck and Cutting-off and Screwing Head. Solid Dies.

Complete.....\$100 00.

**HAND SCREWING MACHINE No. 2.**

For  $\frac{1}{2}$  to 2 inch Pipe, with Fly-wheel, Universal Chuck, and Cutting-off and Screwing Head. Solid Dies.

Complete.....\$250 00.

**POWER SCREWING MACHINE No. 2.**

For  $\frac{1}{2}$  to 2 inch Pipe, with Cone Pulleys and Countershaft, Universal Chuck, and Cutting-off and Screwing Head. Solid Dies.

Complete.....\$275 00.

**SCREWING MACHINE No. 3, IMPROVED.**

For  $\frac{3}{4}$  to 4 inch Pipe, with Countershaft, Universal Chuck, and Cutting-off and Screwing Head.

(Made to use Solid Dies  $\frac{3}{4}$  to 2 inch, and Cutter Dies  $2\frac{1}{2}$  to 4 inches.)

Complete.....\$675 00.

**HILL'S PATENT SOLID DIE.**

(SEE FIG. NO. 55, SUPPLEMENT.)

We claim for this Die the following advantages:

- 1st. It is self-feeding, and therefore requires no exertion to start it.
- 2d. It cuts perfectly free. One side of the tooth being forward of the other, it operates on the principle of a "diamond point" Lathe Tool, thereby obviating the friction produced by the ordinary Die, with blunt, straight tooth, which might be said to scrape out the thread when compared with this improved Die.
- 3d. The particular advantage of this Die, for Pipe work, is that the teeth follow each other in succession in cutting over the seam in the pipe, which prevents the Die from catching in and splitting open the seam, as is often the trouble with the ordinary Die.

The Standard Gas-pipe Dies are made to fit the **WALWORTH PATENT DIE PLATE**.

**SIZE OF DIE.**

2 $\frac{1}{2}$ $\times$ $\frac{3}{4}$ ; Cuts $\frac{1}{4}$ , $\frac{3}{8}$ , $\frac{1}{2}$ , $\frac{5}{8}$ and 1 inch ;	Fits No. 1 Die Plate ; Each	\$3 00

## CHAPMAN'S PATENT SELF-FEEDING AND IMPROVED RATCHET DRILLS.

(SEE FIGS. NO. 52, 53 AND 54, SUPPLEMENT.)

Size.....	No. 1	No. 2	No. 3	No. 4	No. 5
Length of Handle, ins.	10	12	15	17	20
Price, with Self-feed..	9 25	12 00	14 50	17 50	21 00
Price, Plain Improved.	8 50	10 50	13 00	15 00	18 50

Boiler Ratchet; Plain, \$8 50; Self-feeding, \$9 50.

## BENCH VISES.

J. J. Walworth & Co.'s Pattern.

5 inch Jaw... .... \$20 00.

## NASON'S PIPE VISE.

No. 1.....\$15 00 | No. 2.....\$18 00 | No. 3.....\$30 00

**FOSTER'S PATENT GRIP WRENCH.**

(SEE FIG. NO. 65, SUPPLEMENT.)

10 inch.....\$1 75 | 14 inch.....\$2 50 | 18 inch.....\$3 50

**WEBSTER'S PATENT COMBINED WRENCH, PIPE WRENCH AND PIPE CUTTER.**

(SEE FIG. NO. 57, SUPPLEMENT.)

12 inch, with Tools for Pipe $\frac{1}{8}$ to $\frac{3}{4}$ ;	Price.....	\$4 00
15 " " " $\frac{1}{8}$ to $1\frac{1}{2}$ ;	" .....	5 00
18 " " " $\frac{1}{8}$ to 2 ;	" .....	6 00
21 " " " $\frac{1}{8}$ to $2\frac{1}{2}$ ;	" .....	7 00

**Extra Cutters.**

For 12 inch..25 cts. | For 15 and 18 inch..30 cts. | For 21 inch..35 cts.

**Extra Clasps.**

For 12 inch..50 cts. | For 15 and 18 inch..62 cts. | For 21 inch..65 cts.

**MOORE'S TRIPLE ACTION RATCHET WRENCH.**

(SEE FIG. NO. 67, SUPPLEMENT.)

SIZE.	Size of Square Socket. INCHES.	Size of Six Square Socket. INCHES.	PRICE, with one of either Hubs.
1	$\frac{3}{8}-\frac{1}{2}-\frac{5}{8}$	$\frac{5}{8}-\frac{3}{4}$	3 00
2	$\frac{3}{4}-\frac{7}{8}$	$\frac{7}{8}-1$	4 00
3	$1-1\frac{1}{4}$	$1\frac{1}{8}-1\frac{3}{8}$	5 00
4	$1\frac{3}{8}-1\frac{1}{2}$	$1\frac{1}{2}-1\frac{3}{4}$	7 00

**Extra Wrench Hubs.**

For Nos. 1 and 2.....50 cts. each. | For Nos. 3 and 4.....75 cts. each.

**MOORE'S TRIPLE ACTION RATCHET DRILL.**

(SEE FIG. NO. 66, SUPPLEMENT.)

No. 1. — 8 inch Lever.....	\$ 5 00
“ 2. — 10 “ “ .....	6 50
“ 3. — 14 “ “ .....	8 00
“ 4. — 16 “ “ .....	10 00

**TRIPP'S TIGHT-GRIP WRENCH.**

(SEE FIG. NO. 56, SUPPLEMENT.)

The special merits of this Wrench are, its great strength, its rigid grip, its simplicity and durability.

The body and handle are in one piece, and of form combining strength, lightness and convenience for use.

It is made of best Malleable and Swedes Iron.

Price.....\$1 75 each.

**TUFT'S PATENT DRY GAS METERS.**

Capacity, Lights.....	2	3	5	10	20	30	50	100
Price.....	9 25	10 00	12 50	15 50	22 00	28 00	42 50	90 00

**LAVA GAS TIPS AND GAS BURNERS.**

Price Lists furnished on application.

(SEE FIGS. NOS. 40 TO 49, SUPPLEMENT.)

Lava Gas Tips of superior quality, manufactured by us and furnished at low prices.

These Tips are manufactured from a non-conducting material, and being perfectly non-corrosive and much harder than steel, they will always retain the same size burning orifice.

A full assortment always on hand.

**CAST IRON LAMP-POSTS AND LANTERNS.**

Posts with wrought iron frames for Lanterns.....\$20 00, net.  
Copper Lanterns .....\$10 00, net. | Tin Lanterns.....\$9 00, net.
